WARNING

This document contains information affecting the national security of the United States within the meaning of the espionage laws U. S. Code Title 18, Sections 793 and 794. The law prohibits its transmission or the revelation of its contents in any manner to an unauthorized person, as well as its use in any manner prejudicial to the safety or interest of the United States or for the benefit of any foreign government to the detriment of the United States. It is to be seen only by personnel especially indoctrinated and authorized to receive information in the designated control channels. Its security must be maintained in accordance with regulations pertaining to BYEMAN Control System.

1. What is the nature and frequency of your organization's use of the U.S. foreign intelligence requirements categories and priorities that are promulgated in the Attachment to DCID 1/2?

The intelligence requirements as presented in the attachment to DCID 1/2 are not directly used to guide NRO activities. However, they are used indirectly since they are inputs to COMIREX and the SIGINT Committee and are used by those committees in preparing DCI guidance for the NRO.

2. What changes in DCID 1/2 content and/or procedures would make it more useful to your organization?

The DCID 1/2 requirements directly provide little useful information to the NRO, as all NRO systems and R and D activity address subjects having DCID 1/2 priorities of one. The DCID 1/2 priorities become useful to the NRO as they are interpreted by COMIREX and the SIGINT Committee in guidance to the NRO. This system should be retained, however, as utility of the DCID 1/2 priorities would be reduced if they were subdivided to the extent required for utility to the NRO.
